

AP Navigator 4X Antenna™

For Panasonic

The AP-Navigator 4X is a 4-in-1 solution, ideal for Panasonic Toughbook users who want to have Cellular, WiFi and GPS. Since only 2 embedded wireless technologies can be passed through to a docking station, you need a way to do the third technology – GPS. Inside our low profile housing, we provide a Trimble GPS receiver, GPS antenna, Cellular antenna and WiFi antenna. So, all of your antennas and your GPS receiver are in this one unit.

Key Benefits:

Solves the Problem of How to do All 3 Wireless Technologies with embedded wireless inside Panasonic

- ✓ Now, you can embed the Cellular and WiFi in your ToughBook, and then utilize the AP-Navigator 4X to provide the GPS and all of your external antennas.

Very Simple Install – only one unit for everything

- ✓ All three of your antennas and the GPS receiver are in our low profile housing. You will only need to drill one hole and feed the cable assembly once. If you ever need to move this to another vehicle, the take out and re-install will take minutes. Keep all your antennas and GPS system even after you upgrade your laptop or vehicle.

Mapping and Automatic Vehicle Location Technologies

- ✓ The AP Navigator4X Antenna™ is a full 2 way communicating GPS receiver, able to provide 10 foot accuracy. GPS protocols include TSIP, TAIP, TRCM, and NMEA. This means that every AVL software and Internet Mapping solution will work with this GPS receiver.

Bigger Wireless Cellular & WiFi Footprint and Faster Data Speeds

- ✓ The AP Navigator Antenna™ provides up to 25% more wireless coverage, depending on the geography you travel in. Better reception translates to faster speeds. The data gets through the first time, correctly.

Long Product Life — Low Profile Design

- ✓ The AP Navigator 4X Antenna™ has a low profile design. It withstands all of the natural elements, car washes, and being swept by tree branches.

Antenna Plus Connects to . . .

- ✓ **Docking Stations:** Gamber Johnson, LEDCO, PMT, Panasonic, and Kodiak
- ✓ **Wireless Data Cards:** Sierra Wireless AirCard 595, AirCard 595U, AirCard 597E, AirCard 580, AirCard 875, AirCard 875U, AirCard 880E, AirCard 860; NovAtel S720, S620, V620, 720U, 720USB, EX720, V640; Kyocera KPC650; Option GT Max; PC5750 (with adapter from Verizon), Sony GC86
